

MIMS **is coming soon**

Tap into the Pulse of Modern Healthcare with our Clinical Decision Support Platform.

For over 60 years, **MIMS** has delivered trusted medicines information to healthcare professionals across Asia.

Now, **MIMS Pulse** brings that trusted clinical intelligence into the rhythm of everyday care —
through a modern platform designed for faster integration, greater flexibility,
and even better medication decision support.

**Pulse
Workflow Efficiency**
Deliver timely clinical
guidance without
interrupting care.

**Pulse
Clinical Confidence**
Empower safer
prescribing with trusted
medicines information.

**Pulse Future
Readiness**
Adapt to healthcare
systems with flexible,
scalable integration.

**Pulse Operational
Assurance**
Minimise medication
errors and improve
consistency of care.

MIMS 

Safer Medications, Better Care.

One Connected Pulse Across Every Clinical **Workflow**

MIMS **Pulse**

MIMS Pulse combines trusted medicines information with a next-generation clinical decision support platform, helping healthcare organisations achieve safer prescribing, more efficient workflows, and future-ready digital health solutions.

Trusted Medicines Information

Evidence-based, peer-reviewed medicines information maintained through MIMS' ISO-certified editorial process.

Seamless Next-Generation Integration

Modular Web APIs simplify integration with digital health applications, enabling faster implementation.

Flexible Deployment

Deploy on cloud or on-premises infrastructure using lightweight containerised services that scale with your organisation.

Future-Ready Integration

Supports national medicines terminologies and evolving interoperability standards, helping healthcare organisations prepare for tomorrow's digital health ecosystem.

Enhanced Clinical Decision Support

Drug Interaction Alerts	Personalised predisposing factors.
Drug Allergy Alerts	Includes supporting references and SNOMED allergen support.
Drug Health Alerts	Supports SNOMED with readiness for ICD-11.
Drug Pregnancy Alerts	Content now replaces legacy FDA pregnancy categories.
Drug Lactation Alerts	Enhanced to support safer prescribing during breastfeeding.

MIMS Pulse is here to make your workflows safer and faster.
